Try some of our other puzzles: CHECKMATE IN ONE CHECKMATE IN TWO CHECKMATE IN THREE £20.99 £20.99 £25.99 £25.99 Visit the Help section or contact us How does the chess puzzle work? Well, the answer is you have to be familiar with chess moves first and use them to analyze these chess puzzles I've prepared below... ☺ Ok, some chess beginners don't know what mate in 3 or 2 means, I just explained to my daughter about it, and she understood that the king would be checked as part of this particular movement. But what she doesn't understand is how... That's the main question we have to answer, isn't it? Chess puzzles are meant to be challenging to answer, and some of the answers are so above average for chess beginners. I like to start with a friend in 2 or 3 moves and then understand how the chess players come up with this solution. Here in this article, I will share with you mat puzzles that you can practice and use to improve your chess game. Don't forget to read this recommended article: Popular chess holes you need to know click here to read the blog! Chess puzzles mate in 2 White wins these puzzles, and I gave some advice that you can use to solve the game. Always try to solve it first before you go and look for a solution below. This will become very useful if you solve the puzzle first, remember that checkmates are in 2 moves only. It is usually much easier to solve than 3 or more moves. Enjoy mate in 2 puzzles! 1. A special chess move in this chess puzzle, you must checkmate the Black King by first giving the check. Check out the chess puzzle picture below and try to solve it. Chess experts said this was a little hard to answer. But don't be discouraged, all you need to do is try to solve it at least three times. Read also: What is the disadvantage of a backward pawn in chess? 2. Simple chess move In this chess puzzle, you must mat the Black King without any check first. Check out the chess puzzle picture below and try to solve it. The Black King has no way to stop this buddy in two moves. 3. Unlocking move in this chess puzzle, positional thrust is required without any control. Check out the chess puzzle picture below and try to solve it. White will wait for whatever Black will move, and does not have the means to protect the king. 4. Bait move in this chess puzzle, a strategic move is required for white to win in two strokes. Check out the chess puzzle picture below and try to solve it. This practice puzzle will be easy once you know which square you need to exit the game. 8. Unmated Chess Piece This chess puzzle shows the power of chess tactics that can lead to a big problem for any chess player. Look at the chess puzzle picture below and try to solve it. When assessing your next move, find the way white needs to make a simple move that black can't stop the inevitable mat in two strokes. 9. Capture the right square in this chess puzzle, white is down one small chess piece against the black. This will not be the deciding factor in this chess puzzle. Instead, White needs to take the simple step of having a positional advantage. Check out the chess puzzle picture below and try to solve it. You must be assessing the right options for you to take, capture or not. 10. One Move Sacrifice A lot happens in this chess puzzle; You have a Black Queen on an absolute pin and many other possible attacks as it can move. Look at the chess puzzle picture below and try to solve it. All you need to find out is which movement you can sacrifice losing and which move your opponent has no choice but to lose after moving. Chess puzzle solution for mat in two strokes: 1. Special chess move You can solve this chess problem by first giving control to the White Queen, and then black answer by protecting the king with f5 pawn. But... White can capture a pawn with an unusual pull en passant. Check the image and chess note below: 1. ♖g4+ f5 2. ♗f6 # Black is a buddy in two. You can try other variants and practice solutions to these variations that you may find. That would be a fun way to improve your chess game. I also wrote an interesting article about chess pawn en passant. 2. Simple chess move The only chess piece you should move with white is the queen. Queen h3 solves the puzzle and forces you to follow what the Black King will try to move on. Check out the picture and chess notation below: 1. ♖h3 ♖xd4 2. ♗xc3# Black is a buddy in two. There are other chess moves that Black can do ale and and and let it work out for you. 3. Unblocking Move Move is the Queen on h7, aiming to open the blocked c2 square. Check the image and chess note below: 1. ♖h7 ♖d3+ 2. ♖d3 # Excellent white thrust, and thus forces Black for a two-motion mat. This is a lot of fun to deal with; You can make at least one or two variations found on this puzzle. Have fun solving this mat in two strokes. 4. Bait Move Move Is The Queen on D1, tempting the Black Bishop to capture the White Queen. But in doing so, White can have Black. Check out the picture and chess notation below: 1. ♖d1 ♗xd1 2. ♖d4 # There are many ways or variations of White can win in two strokes, and this is a fun way for you to practice. Improve your game by picking up some basic tactics and using them for the next game. 5. Almost stalemate Move Movement is excellent, and White's threat to the two-movement buddy is still intact. You have to move the Rook to D4, ready for whatever Black will move on. Check out the picture and chess notation below: 1. ♖d4 ♖xd4 2. ♗f6# There is no escape for the mat. Again, you can try other moves for black, but eventually you will find that black has no way to escape two thrust mat from white. 6. Check and protect the important chess pieces that you need to be looking at the black square bishop and pawn on F5. Check out the picture and chess notation below: 1. ♖h3 c4 2. ♖f2 #The move is Queen to h3 if Knight on g4 will check the King the White Queen is still guarding the pawn. Either way, if Black moves any of his pawns, white chess pieces will be protected at every check. This is how white can mat Black in two. After moving the queen to h3, try other variants that are not in the notation. It will be fun to solve this problem of mating in two strokes. 7. Uncovering the square I tried the next step for the Queen, but chess experts say the best move, and the right one is the queen of the G7. Look at the picture and the chess note below: 1. ♗g7 ♗xg7 2. ♖e6# Sacrifices the Queen to attack the only square by which the black king can move, which is D4. By removing the Black Queen by sacrificing your queen, you can do a double attack tactic while having the king in two strokes. Practice after moving the Queen to the G7 and find other variations to mat in two strokes. 8. Unmated chess piece The correct and straightforward move is king on b8, just trying to put pressure on Black and his inevitable mother. Check out the picture and chess notation below: 1. ♔b8 d5 2. ♖f8 # An excellent way to end a game where the power of Pinning has been demonstrated well for whites to win the game. Another variation after King on b8 is here for you to find out and enjoy. 9. Capturing the right square So in this chess puzzle, the correct answer is King h4. It's a waiting move that leaves Black with no choice but to either check on the White King, who will be useless or resign. See picture and chess note below: 1. ♔h4 ♗f6+ 2. ♗x6 # Well, of course, Black did not resign After King's h4 White has different variations to win in two strokes. Go ahead and try other variations you can think of in this particular puzzle. 10. One stroke The victim of the correct move is one stroke the victim of the tower on the D3 will be on D2... Moving towers to D2 opens a diagonal file for the Queen, in which the control completes the game in 2 moves. Check the image and the chess note below: 1. ♖d2 ♗xg8 2. ♖c4 # If you still want to try some other variations, do so because I made some interesting variations after the Tower on the D2 move. Have fun! Chess puzzles mate in 3 Unlike a friend in 2 puzzles, you have to think much harder here and use both your tactics and strategic mind in this practice game below... The same with previous puzzles, answers or solutions are right below this chess puzzle. It is recommended that you only check the solution if you have tried at least three times in solving puzzles. You will at least develop an excellent understanding of checkmates and of course improve your game for sure. Enjoy mate in 3 puzzles! 11. Control Black Squares This is a good practice puzzle where the black king has two square options to move around, and if white makes a bad move, the Black King can still escape the three moves mate. Look at the chess puzzle picture below and try to solve it. You must be analyzing how to control the squares that you must use to checkmate the Black King. 12. Stay away from interference We can see in this chess puzzle that the king can no longer escape the threat of mat from white. Look at the chess puzzle picture below and try to solve it. You have to play the game waiting for this one to perform a three-movement mat. have fun. 13. Sideways Attack This chess puzzle seems like black has a material advantage, but not much Black can do for an approaching buddy in three strokes. Look at the chess puzzle picture below and try to solve it. By waiting for the move, then force your opponent to make a mistake. Find the best waiting move in the game. 15. Give up control for beginners, it could be quite difficult to solve, but a good practice puzzle for you to improve your strategy and chess tactics skills. Look at the chess puzzle picture below and try to solve it. In this chess puzzle, you have to give up control of the squares, which will improve your position to perform a three-stroke mat. 16. Moving the target in this chess puzzle, you can see that the black tower is attacking the White Queen. Also looking at white position, especially tiny chess pieces, they are all ready to attack Mate the Black King in three strokes. Look at the chess puzzle picture below and try to solve it. You have to look beyond other options mating the Black King in three strokes. 17. Attack on both sides As you can see on this next practice chess puzzle, Black has a stronger chess piece because black still has its queen. Look at the chess puzzle picture below and try to solve it. You have to look at ways to stop black from protecting the king, and you can use your chess pieces to attack both sides. 18. Choosing the winning exchange In this chess puzzle, you will notice that white fewer pawns, but have the opportunity to capture the Black Tower. Look at the chess puzzle picture below and try to solve it. You have to consider what opportunity you will gain and play in this puzzle. 19. Dark Square Setup No pawn chance for white if you look at this chess puzzle, but when you see the solution you will find that the material advantage loses with excellent positional advantage. Look at the chess puzzle picture below and try to solve it. You must be looking at a specific square to mat the Black King in 3 moves. 20. The power to capture this chess puzzle, you need to look at how you can occupy the square, which can help immobilize the king. Look at the chess puzzle picture below and try to solve it. There are only a few chess pieces for this game, and there is a concrete step to make sure that the Black King will be paired in 3 moves. 21. Clever Pawn Trap In this chess puzzle, we'll take a look at how the black king is trapped with a white pawn and a black pawn. There's a chance of a stalemate here for Black, and you have to be careful what chess pieces to move or not to move. Look at the chess puzzle picture below and try to solve it. You must be using a pawn in order to perform a three-movement mat for the Black King. Chess puzzle solution for mat in three strokes: 11. Controlling Black Squares The correct move is Bishop at E7, not only do they still have control over the black squares White is already preparing for mating the Black King in several variations. Check out the picture and chess notation below: 1. ♗e7 f5 2. ♗d4+ ♖x4 3. ♖g6 # Go ahead and try other variations for white mating black king after Bishop White on E7 move. 12. Stay away from interference So the best waiting move for white is Bishop on h2. Look at the picture and chess notation below: 1. ♗h2 ♖e4 2. ♖xc3+ ♗xc3 3. ♖d3 # If you analyze the practice puzzle, just move Knight to C7 to be able to have a decisive win against Black, but at the same time, if you did not move bishop h2, your diagonal will be blocked. Other variations are fun to practice, continue and practice with different variations that you can see. 13. Sideways Attack The best move is to place a knight on the a5, so have control over two light squares on set c. Check out the picture and chess notation below: 1. ♖a5 ♖d5 2. ♖c5+ ♖xd6 3. ♖b7 # After mixing Knight, black can Any movement wants, but there is no way Black can stop the mat after moving the tower to any variation. You can try other variations for this one and see what works. Enjoy! ☺ 14 July 2004. the Commission shall Forced waiting to move the best waiting move is the queen h6, and this step still allows you to control 6. Look at the picture and chess notations below: 1. ♗h6 ♖b4 2. ♗c1 ♖a5 3. ♗a3# By dragging the Queen to C1 now you can combine the Queen and the King for the mighty mother. There are several variants that you need to solve yourself, and its not that difficult once you have found the best waiting move in this practice chess puzzle. 15. Relinquishing control of the Correct Move is Knight g at E7, although Knight has reasonable control over e5 square, has no opportunity to have a king. Check the picture and chess notary below: 1. ♖e7 ♖c4 2. ♖d6+ ♖b4 3. ♖c6 # Now, after moving knight to E7, the black king can be imprisoned to either go to the already controlled E5 square or even to c4 on b4 square. Try other variations and make sure you get some basic pointers with this chess puzzle. 16. Moving target So I hope you were able to solve this chess puzzle yourself... The right move moves the bishop to H3, attacks the Black Tower and sacrifices our queen. Check the picture and chess note below: 1. ♗h3 ♖xg1 2. ♖d4+ ♖c5 3. ♖, when Black took over the White Queen, it's over. All you have to do is move the tower and then whatever black moves on it will take in three. 17. Attack on both sides the correct step is Bishop on C5; not only blocks the Queen from protecting the critical Square A7, but also prevents the Black Bishop from protecting Square F3. Look at the picture and chess notation below: 1. ♗c5 ♗xc5 2. ♖a3+ ♗a3 3. ♖a7 # After moving the Black Bishop, you must attack both sides of that square by sacrificing one of your tur towers. Try other chess variations for this puzzle and remember this step of combination to move with mating in three strokes. 18. Choosing a Winning Exchange So You Capture the Tower? If not, then you are fantastic because the right move is Bishop on b8. With this step, I believe it's a waiting move, and after that step, White will play another waiting move with the Queen. Depending on the answer Black. Check out the picture and chess notation below: 1. ♗b8 e3 2. ♗c8 ♖e4 3. ♖f6 # If the black king has not moved, then our queen move to C8 is the right answer, still blocking the Black King on the c file. You make three moves with a knight. Try some variations after bishop b8 move white. 19. Dark Square Setting you sacrifices the White Queen, and capture her with a double knight attack. Since the correct move is Knight on h5... Check the picture and chess note below: 1. ♖h5 ♗xg2 2. ♖f4+ ♖e5 3. ♗xh6 # After black captures your queen, you can check the king with your knight and create a fork with the queen. Do you know that you You need to capture the queen at this point on the right, because checking the bishop on the dark square is the setting for the partner in 3 moves. There are other variations you can look as if the pawn is taking Knight. It's a fun variation, and I know you can solve it too! 20. Force Capture Ok, so the right step is in the double pawn structure of white... The move is Pawn on F3, which are moving attacks to E4 and G4 squares to help White prepare for sacrifice for bishops after inspection. See the image and chess not caption below: 1. f3 d5 2. ♗f5+ ♖h5 3. ♗f7 # It may be forced capture for the Black King, or it can move to d file, but whatever movement the Black King will make it will be over in 3 moves. 21. Clever Pawn Trap I hope you have been able to find the right answer because the right move moves Bishop to C2. It's like a waiting move, and Black has a few options, but all the moves I have to check leads to a three-movement mat. Look at the picture and chess notation below: 1. ♗c2 gxf6 2. ♗d3 f5 3. ♗xe2 # Ok, so after moving the bishop to C2, Black can move the pawn and capture the pawn on F6 and then White has a clever move moving the bishop to D3 trying to capture the black pawn and then forcing him to. There are other variations, of course, but I'll just let you figure out how to solve those puzzles. Enjoy! Check out chess recommendations here. Packing up this article is a lot of fun to write, and I was able to analyze quite a lot of chess puzzles and find out the excellent responses to mating in two and three strokes... ☺ advantage of practicing this chess puzzle for 2 or 3 moves mate is that you can exercise your analytical skills and improve as you look at ways to mate your opponent. The only thing I would advise beginners is if you have a hard time solving puzzles to proceed and check the solution, but then try to understand the position and answer yourself why it is the best move of this game. I hope you could learn and have fun with these chess puzzles, and I wanted to share this type of chess puzzles with you. If you have any great chess puzzles that you want to share, leave a comment and I'll try to solve them... ☺re solving some chess puzzles! Puzzles!
